

SLA Calculator!

Made by JD Mitchell

The screenshot shows the SLA Calculator 2.0! interface. At the top, it displays the current time as TUE, 05/05/2026, 10:44, and a state selector set to VIC. Below this, the SLA selector shows 'Zuul' as the provider and 'metro' as the SLA. A 'Quick Reference Guide' button is also present. The 'Operating hours' section includes a '24 Hours' button, a day selector set to 'MON', and fields for 'Opening' and 'Closing' times. A 'REMOVE!' button is next to the day selector. Below the operating hours, there is an 'Add More' button. At the bottom, there are 'Calculate' and 'Reset' buttons. The 'Calculated SLA' output section shows fields for 'Day', 'Date', and 'Time'. Below this, a 'Business Hours' section is highlighted in red. The footer contains version information (Ver 2.0.2), copyright (© 2025 Ingenico), and creator information (Created by JD Mitchell).

Calculated SLA output:

- Day
- Date
- Time

This Quick Reference Guide

Quick Reference:

1. Select a State from the state dropdown menu.
2. Select a bank from the Providers dropdown menu on the SLA selector.
3. Select an SLA from the dropdown menu that appears.
4. Select a starting day in the dropdown menu and an ending day from the dropdown menu.
5. Enter in an Opening Time and a Closing Time in 24-hour time in numbers only, i.e. 0900 for 9 AM and 1800 for 6PM.
 - If you need to add more times, click on the “Add More” button.
 - If you require a single day, i.e. late-night Thursday from 0900 to 2100, set the starting and ending days as the same day i.e. THU to THU and then desired opening and closing time.
 - For businesses that are open 24/7, press the 24 Hours button. This will lock the operating hours section. Click the reset button if you need to change back to normal operating hours.
 - For any day or group of days that are closed, you can select the starting and ending days and then simply type “closed” without quotes into the opening time.
 - If you need to remove any days that have been added by mistake, click the Remove button.
6. Once all days and times have been added, click on Calculate to get a calculated SLA.
7. Click on the Copy Date, Copy Time and Copy buttons to copy the date to the clipboard that can then be pasted into CAMs.
8. To reset the calculator, click on the reset button.
